Patient Name	Master. VATSALYA	Requested By	DR. RANJEET KUMAR
MRN	21009 /OPD	Procedure Date	21.12.2021
Age/Sex	04 Y / MALE	Hospital	21.12.2021

MRI BRAIN WITH ORBIT (PLAIN + CONTRAST)

Technique : Multi-planar, multi-sequence imaging of the brain and orbit were performed without and with intravenous contrast.

Axial - T1, T2, FLAIR DWI, Sagittal - T2 & Coronal - T2WI.
Post Gad T1WI in Axial, Coronal & sagittal planes.
Axial - T1 SE, SPIR, T2 TSE, Sagittal (Oblique) - PD

OBSERVATION

T1 hypointense, T2 intermediate signal intensity mass lesion with interspersed T1 and T2 hyperintense areas within showing heterogeneous post contrast enhancement noted involving right globe. There is extra-scleral extension into the intraconal compartment and along the right orbital segment of optic nerve upto the orbital apex. The lesion shows patchy restricted apex. The lesion shows patchy restricted diffusion and intralesional blooming on SWI- s/o calcifications and bleed.

Enlarged and heterogeneously enhancing enlarged right pre-auricular and cervical lymph nodes (right level IB, level II and level V noted), largest level Ib lymph node measuring 40 x 39 mm. Few nodes shows central necrosis.

Small T1 iso T2 hyperintense foci noted in right frontal lobe showing enhancement on post contrast study. Could be metastatic lesion.

Optic chiasma is spared.

Left globe and orbit normal.

Left optic nerve is normal.

Extra Ocular muscles are normal in signal, intensity and size.

Intra and extra conal area are normal in signal intensity.

Rest of the brain parenchyma appears normal.

Brain stem normal signal intensity. No evidence of focal / diffuse lesions.

Bilateral cerebellar hemisphere normal signal intensity. No evidence of focal / diffuse lesions.

Bilateral CP angles normal. No evidence of CP angle mass lesion.

Pituitary is normal in size, shape and signal intensity. No evidence of focal / diffuse lesion.

Bilateral basal ganglia normal.

Cerebral vasculature unremarkable.

The posterior fossa appears unremarkable.

The sulci and basal cisterns are unremarkable.

Ventricular system appears normal. No evidence of hydrocephalus of peri-ventricular ooze.

नेत्र ईश्वरीय सर्वश्रेष्ठ उपहार है जिनका मनुष्य जीवन में दान करना परमश्रेष्ठ है।

इनकी पूर्ण रक्षा कीजिए ताकि ये आपकी रक्षा कर सकें।

Eyes are God's most precious gift to man kind and eye donation is the most noble deed.

Take full care of them so that they can take care of you.
